Techroutes TSR-2900-20 Series builds a real multiservice broadband platform by providing rich software functions such as routing, switching, safety, VPN and LTE.

With its strong processing and expansion capability, rich software functions and hardware modules, Techroutes TSR-2900-20 Series meet requirements of the government, financial institutions, the defense system, operators and enterprises in network construction.

Main Characteristics

Powerful Performance

Techroutes TSR-2900-20 Series is driven by the 64-bit dual-core processor with specialized gigabit ASIC switching chip and FPGA components, which enables the whole hardware platform to run on the high-speed Ethernet frame. The innovative design endows TSR-2900-20 with a super processing capability, providing a guarantee for upper-layer software functions.

High Expandability

Because built on the basis of switching core, Techroutes TSR-2900-20 Series can expand their external interfaces, slots and modules without any limitation from the total CPU resources. The switching chip guarantees that the whole Techroutes TSR-2900-20 router is provided with sufficient and broadband internal channels, making the expansibility of Techroutes TSR-2900-20 routers exceed that of traditional modularized routers.

Excellent Power-saving ability

Techroutes TSR-2900-20 Series adopts the new-generation hardware chip in consideration of energy saving while guaranteeing its strong processing capacity. Compared with the mainstream devices in the industry, power consumption of the TSR router is reduced by 15% to 20%, which both reduces the device maintenance cost and accords with the low-carbon idea. Techroutes TSR-2900-20 Series is also equipped with the environment friendly maglev mute fan..

Various Protocol Support

Techroutes TSR-2900-20 Series supports Layer 2 link protocols including PPP and dot1q; static routing; policy routing; and dynamic routing such as RIP, OSPF and BGP. These routing protocols are well compatible with the devices manufactured by the mainstream vendors in the industry. Besides, TSR-2900-20 Series supports integration of multiple services such as routing, switching, voice, safety and wireless, which meets the requirement of complicated network construction.

New Service

Techroutes TSR-2900-20 Series supports the MPLS characteristics and the MPLS-based layer-2/layer-3 VPN technology, which realize the transparent Ethernet transmission service and the flexible enterprise interconnection. Techroutes TSR-2900-20 Series supports IPv6 data forwarding, routing protocols and multicast routing protocols; Techroutes TSR-2900-20 Series also supports the IPv4/IPv6 protocol stack and the interconnection technology, which makes the existing networks smoothly upgrade to IPv6.

Secure Service Access

Techroutes TSR-2900-20 Series supports selective ACL firewall filtration technology, NAT, VPNs such as IPSec/L 2TP/PPTP/GRE, and security technologies such as AAA, Radius, PAP/CHAP.

Traffic management policy

Techroutes TSR-2900-20 Series supports varied queues including FIO, PQ, CQ, CBWFQ, LLQ, WFQ DSCP, IP Precedence, RTS, RSVP and CAR.

Techroutes TSR-2900-20 Series supports its self-developed traffic control and service management policy (GBSC) which can better real-time arrange and monitor your data traffic.

Flexible management and maintenance

Techroutes TSR-2900-20 Series is convenient in managing and monitoring the network by using the in-band and out-band management tools such as Console, Telnet, SSH and SNMP;

Complete Layer-2 Switching Capacity

Techroutes TSR-2900-20 Series supports Layer-2 switching with the built-in high performance switching chip. It supports layer-2 protocols including STP/RSTP/MSTP, MAC learning and filter, anti-attack based on the chip, storm control and port mirroring.
